DOWNLOADING AND INSTALLING THE STM32 WORKBENCH

1. Go to *https://www.openstm32.org/HomePage.*

2. Log in if you have an account, or register for one if you do not.

3. After logging in, in the "Step 1: Explore" section, you will see a line that says, "Instructions are provided here." Click on the link and follow the instructions. You want to install the STM32 Workbench from the installer, not Eclipse.

4. After installing the STM32 Workbench, enter the following to add i386 support and install `libncurses5` for i386:

```
sudo dpkg --add-architecture i386
sudo apt-get update
sudo apt-get install libncurses5:i386
```
