

# CONTENTS IN DETAIL

<b>FOREWORD</b>	<b>xix</b>
<b>ACKNOWLEDGMENTS</b>	<b>xxiii</b>
<b>INTRODUCTION</b>	<b>xxv</b>
Who Is This Book For? .....	xxvi
What Can You Expect to Learn? .....	xxvii
About This Book .....	xxvii
<b>1 GETTING STARTED</b>	<b>1</b>
The Operating Environment .....	1
NumPy .....	2
scikit-learn .....	2
Keras with TensorFlow .....	2
Installing the Toolkits .....	3
Basic Linear Algebra .....	4
Vectors .....	4
Matrices .....	5
Multiplying Vectors and Matrices .....	5
Statistics and Probability .....	6
Descriptive Statistics .....	6
Probability Distributions .....	7
Statistical Tests .....	8
Graphics Processing Units .....	9
Summary .....	9
<b>2 USING PYTHON</b>	<b>11</b>
The Python Interpreter .....	11
Statements and Whitespace .....	12

Variables and Basic Data Structures .....	13
Representing Numbers .....	13
Variables.....	14
Strings .....	14
Lists .....	15
Dictionaries .....	18
Control Structures.....	19
if-elif-else Statements.....	19
for Loops .....	19
while Loops .....	22
break and continue Statements .....	22
with Statement .....	23
Handling Errors with try-except Blocks .....	24
Functions .....	24
Modules .....	26
Summary .....	27

## **3** **USING NUMPY** **29**

Why NumPy? .....	29
Arrays vs. Lists .....	30
Testing Array and List Speed .....	31
Basic Arrays .....	33
Defining an Array with np.array.....	33
Defining Arrays with 0s and 1s.....	36
Accessing Elements in an Array .....	37
Indexing into an Array .....	37
Slicing an Array.....	39
The Ellipsis .....	41
Operators and Broadcasting.....	42
Array Input and Output .....	45
Random Numbers .....	48
NumPy and Images .....	48
Summary .....	50

## **4** **WORKING WITH DATA** **51**

Classes and Labels .....	51
Features and Feature Vectors .....	52
Types of Features.....	53
Feature Selection and the Curse of Dimensionality .....	55

Features of a Good Dataset.....	57
Interpolation and Extrapolation .....	58
The Parent Distribution .....	60
Prior Class Probabilities .....	60
Confusers .....	61
Dataset Size .....	62
Data Preparation .....	63
Scaling Features.....	63
Missing Features .....	67
Training, Validation, and Test Data .....	68
The Three Subsets .....	68
Partitioning the Dataset.....	69
k-Fold Cross Validation .....	74
Look at Your Data .....	76
Searching for Problems in the Data .....	76
Cautionary Tales .....	80
Summary .....	81

## **5 BUILDING DATASETS 83**

Irises .....	84
Breast Cancer .....	86
MNIST Digits .....	88
CIFAR-10 .....	90
Data Augmentation .....	92
Why Should You Augment Training Data?.....	93
Ways to Augment Training Data .....	94
Augmenting the Iris Dataset .....	95
Augmenting the CIFAR-10 Dataset.....	101
Summary .....	105

## **6 CLASSICAL MACHINE LEARNING 107**

Nearest Centroid .....	108
k-Nearest Neighbors .....	112
Naïve Bayes.....	113
Decision Trees and Random Forests .....	117
Recursion Primer .....	120
Building Decision Trees.....	121
Random Forests .....	122

Support Vector Machines .....	124
Margins .....	124
Support Vectors .....	126
Optimization .....	126
Kernels .....	127
Summary .....	128

## **7**

## **EXPERIMENTS WITH CLASSICAL MODELS 129**

Experiments with the Iris Dataset .....	129
Testing the Classical Models .....	130
Implementing a Nearest Centroid Classifier .....	133
Experiments with the Breast Cancer Dataset .....	135
Two Initial Test Runs .....	135
The Effect of Random Splits .....	138
Adding k-fold Validation .....	140
Searching for Hyperparameters .....	145
Experiments with the MNIST Dataset .....	150
Testing the Classical Models .....	150
Analyzing Runtimes .....	156
Experimenting with PCA Components .....	158
Scrambling Our Dataset .....	161
Classical Model Summary .....	162
Nearest Centroid .....	162
k-Nearest Neighbors .....	163
Naïve Bayes .....	163
Decision Trees .....	164
Random Forests .....	164
Support Vector Machines .....	165
When to Use Classical Models .....	165
Handling Small Datasets .....	165
Dealing with Reduced Computational Requirements .....	165
Having Explainable Models .....	166
Working with Vector Inputs .....	166
Summary .....	167

## **8**

## **INTRODUCTION TO NEURAL NETWORKS 169**

Anatomy of a Neural Network .....	170
The Neuron .....	171
Activation Functions .....	172
Architecture of a Network .....	176
Output Layers .....	178
Representing Weights and Biases .....	180

Implementing a Simple Neural Network .....	182
Building the Dataset .....	182
Implementing the Neural Network .....	183
Training and Testing the Neural Network.....	185
Summary .....	188

## **9 TRAINING A NEURAL NETWORK 189**

A High-Level Overview .....	190
Gradient Descent .....	190
Finding Minimums.....	192
Updating the Weights .....	193
Stochastic Gradient Descent .....	194
Batches and Minibatches.....	195
Convex vs. Nonconvex Functions .....	196
Ending Training .....	197
Updating the Learning Rate .....	198
Momentum .....	199
Backpropagation .....	200
Backprop, Take 1 .....	200
Backprop, Take 2 .....	204
Loss Functions .....	208
Absolute and Mean Squared Error Loss .....	209
Cross-Entropy Loss.....	210
Weight Initialization .....	211
Overfitting and Regularization .....	213
Understanding Overfitting .....	213
Understanding Regularization .....	215
L2 Regularization .....	216
Dropout .....	217
Summary .....	219

## **10 EXPERIMENTS WITH NEURAL NETWORKS 221**

Our Dataset .....	222
The MLPClassifier Class.....	222
Architecture and Activation Functions .....	223
The Code .....	223
The Results .....	227
Batch Size .....	231
Base Learning Rate .....	235
Training Set Size .....	238
L2 Regularization .....	239
Momentum .....	242
Weight Initialization .....	243

Feature Ordering .....	247
Summary .....	249

## **11 EVALUATING MODELS 251**

Definitions and Assumptions .....	251
Why Accuracy Is Not Enough .....	252
The 2 x 2 Confusion Matrix .....	254
Metrics Derived from the 2 x 2 Confusion Matrix .....	257
Deriving Metrics from the 2 x 2 Table .....	257
Using Our Metrics to Interpret Models .....	260
More Advanced Metrics .....	262
Informedness and Markedness .....	262
F1 Score .....	263
Cohen's Kappa .....	263
Matthews Correlation Coefficient .....	264
Implementing Our Metrics .....	264
The Receiver Operating Characteristics Curve .....	266
Gathering Our Models .....	266
Plotting Our Metrics .....	268
Exploring the ROC Curve .....	269
Comparing Models with ROC Analysis .....	271
Generating an ROC Curve .....	273
The Precision–Recall Curve .....	275
Handling Multiple Classes .....	276
Extending the Confusion Matrix .....	276
Calculating Weighted Accuracy .....	279
Multiclass Matthews Correlation Coefficient .....	281
Summary .....	282

## **12 INTRODUCTION TO CONVOLUTIONAL NEURAL NETWORKS 283**

Why Convolutional Neural Networks? .....	284
Convolution .....	284
Scanning with the Kernel .....	285
Convolution for Image Processing .....	287
Anatomy of a Convolutional Neural Network .....	288
Different Types of Layers .....	289
Passing Data Through the CNN .....	291
Convolutional Layers .....	292
How a Convolution Layer Works .....	292
Using a Convolutional Layer .....	295
Multiple Convolutional Layers .....	298
Initializing a Convolutional Layer .....	299

Pooling Layers .....	299
Fully Connected Layers .....	301
Fully Convolutional Layers .....	302
Step by Step .....	304
Summary .....	308

## **13 EXPERIMENTS WITH KERAS AND MNIST 309**

Building CNNs in Keras .....	310
Loading the MNIST Data .....	310
Building Our Model .....	312
Training and Evaluating the Model .....	314
Plotting the Error .....	317
Basic Experiments .....	319
Architecture Experiments .....	319
Training Set Size, Minibatches, and Epochs .....	323
Optimizers .....	326
Fully Convolutional Networks .....	328
Building and Training the Model .....	328
Making the Test Images .....	331
Testing the Model .....	333
Scrambled MNIST Digits .....	340
Summary .....	342

## **14 EXPERIMENTS WITH CIFAR-10 343**

A CIFAR-10 Refresher .....	343
Working with the Full CIFAR-10 Dataset .....	344
Building the Models .....	345
Analyzing the Models .....	348
Animal or Vehicle? .....	352
Binary or Multiclass? .....	357
Transfer Learning .....	361
Fine-Tuning a Model .....	367
Building Our Datasets .....	368
Adapting Our Model for Fine-Tuning .....	371
Testing Our Model .....	373
Summary .....	375

## **15 A CASE STUDY: CLASSIFYING AUDIO SAMPLES 377**

Building the Dataset .....	378
Augmenting the Dataset .....	379
Preprocessing Our Data .....	383

Classifying the Audio Features .....	385
Using Classical Models .....	385
Using a Traditional Neural Network.....	388
Using a Convolutional Neural Network.....	389
Spectrograms.....	394
Classifying Spectrograms .....	398
Initialization, Regularization, and Batch Normalization .....	402
Examining the Confusion Matrix.....	403
Ensembles .....	404
Summary .....	408

## **16 GOING FURTHER 411**

Going Further with CNNs .....	411
Reinforcement Learning and Unsupervised Learning .....	412
Generative Adversarial Networks.....	413
Recurrent Neural Networks .....	414
Online Resources .....	414
Conferences .....	415
The Book .....	416
So Long and Thanks for All the Fish .....	416

## **INDEX 417**
