

INDEX

Symbols

Lukasiewicz, Jan, 117

A

alleles, 85, 93
Apple II, 212
atmospheric noise, 17
Audacity, 12

B

backpropagation, 182
Bacon, Sir Francis, 40
Barnsley, Michael, 224
Bayes' theorem, 328
 components, 328
Bayes, Thomas, 327
Bayesian inference, 328
Bertrand's paradox, 101
Bertrand, Joseph, 100
big O notation, 301
Biles, Al, 253
block randomization, 276
Bourke, Paul, 229
box plot, 79
Box, George, 74

C

calculus
 integration, 324
Cantor, Georg, 325
central limit theorem, 4
Cohen's d , 275
color table, 215
combinatorial explosion, 298
compressed sensing, 255
 aliasing, 263
 discrete cosine transformation, 258
 inverse problem, 257
 Lasso optimization, 258
 norm, 258

 Euclidean, 258
 Manhattan, 258
 Nyquist-Shannon sampling, 256
 sparsity, 257
 underdetermined system, 257
 uniform sampling, 256
confusion matrix, 188, 191
Coppersmith-Winograd algorithm,
 305
Cramer's rule, 236
cryptographically secure, 27
cryptography, 39
cumulative distribution function
 (CDF), 325
curse of dimensionality, 349
curve fitting, 106

D

Darwin, Charles, 85
data augmentation, 175, 179
dataset
 breast cancer, 174
 irises, 198
 MNIST, 178
 MNIST small, 208
decision tree, 198
 interpreting, 200
Devroye, Luc, 282
dinosaurs, 93
discrete cosine transformation, 258
divide-and-conquer algorithm, 315
duck typing, 111

E

Eberhart, Russell, 115
ent, 6
entropy, 7
Euclidean distance, 86, 196
evolution
 crossover, 85, 86
 extinction, 101

- fitness, 86
- founder effect, 93
- genetic drift, 85
- genotype, 95
- mutation, 85, 86
- natural selection, 85
- population bottleneck, 93
- evolutionary algorithms, 103
 - algorithms
 - differential evolution, 105, 115
 - genetic, 105, 114
 - organisms, 104
- experimental design, 271
 - block randomization, 276
 - control group, 275
 - covariates, 277
 - double-blind study, 278
 - effect size, 275
 - power analysis, 291
 - random noise, 271
 - sample bias, 272
 - simple randomization, 275
 - stratified randomization, 277
 - treatment group, 275
- explainable AI (XAI), 198
- extreme learning machine, 173, 189

F

- Farmer, J. Doyne, 12
- Fermat, Pierre, 311
- fractals
 - attractor, 227, 228
 - chaos game, 225
 - Hausdorff dimension, 226
 - iterated function system, 227
 - contraction mapping, 228, 232
 - creating maps, 234
 - map, 228, 229
 - self-similar, 224
 - Sierpinski triangle, 225
- Freivalds' algorithm, 302

G

- galactic algorithm, 305
- generative AI, 253
- gradient descent, 182
- Great Dying, The, 93
- grid warping

- functions, 221
 - rotation, 223
- Gundersen, Gregory, 353

H

- Haahr, Mads, 17
- Halton sequence, 24
- Hamming distance, 251
- Hartl, Daniel, 73
- Herodotus, 40
- histogram, 5
- HotBits, 20
- hypothesis testing
 - Mann-Whitney U, 186
 - t-test, 186

I

- image formats, 62
 - grayscale, 62
 - RGB, 62
- inverse problem, 257
- iterated function system, 227
 - attractor, 228
 - contraction mapping, 228, 232
 - creating maps, 234
 - map, 228, 229

K

- Kennedy, James, 115
- Kilroy was here, 67
- Kneusel, Paul (composer), 56

L

- Las Vegas algorithm, 296
- Lasso optimization, 258
- linear congruential generator, 21

M

- machine learning
 - data augmentation, 175, 179
 - decision tree, 198
 - interpreting, 200
 - extreme learning machine, 173
 - overfitting, 200
 - random forest, 173, 198
