INTRODUCTION	XIX
---------------------	------------

Who Should Read This Book?	xx
What's in This Book?	xx
The Companion Website	xxi
Have Fun!	xxi

PART 1: XCODE AND SWIFT

1	
HELLO, WORLD!	3

Installing Xcode, Your Code Editor	4
Your First App!	5
Introducing the Storyboard	9
Adding User Interface Elements with the Object Library	10
Saving Your Work	13
Running the App on a Real Device	14
What You Learned	16

2	
LEARNING TO CODE IN A PLAYGROUND	17

Constants and Variables	19
When to Use Constants vs. Variables	21
Naming Constants and Variables	22
Data Types	22
Declaring Data Types	23
Common Data Types	24
Type Inference	25
Transforming Data Types with Casting	26
Operators	27
Order of Operations	30
Ordering Operations with Parentheses	30
Compound Assignment Operators	31
What You Learned	33

3	MAKING CHOICES	35
Boolean Expressions		36
Is Equal and Is Not Equal		36
Greater Than and Less Than		37
Compound Boolean Expressions		38
Conditional Statements		40
if Statements		40
switch Statements		44
What You Learned		45
4	WRITING CODE THAT LOOPS	47
Open the Debug Area		48
Looping Through Ranges and Collections with for-in		48
Say Hello!		48
Say Good Morning!		50
Testing Conditions with while Loops		50
Guess My Number		51
Shrink Away		52
Which Loop to Use?		53
Nesting and Scope		54
Nesting Blocks of Code		54
Constant and Variable Scope		55
What You Learned		57
5	KEEPING YOUR PROGRAMS SAFE WITH OPTIONALS	59
What Is an Optional?		60
Creating Optionals		60
Unwrapping Optionals		61
A Special Kind of Operator: ??		65
What You Learned		65
6	STORING COLLECTIONS IN DICTIONARIES AND ARRAYS	67
Keeping Things in Order with Arrays		67
Using Mutable and Immutable Arrays		68
Using Type Inference		69
Accessing Items in an Array		69
Watching the Range		69
Adding Items to an Array		70
Combining Arrays		71
Removing Items from an Array		71
Replacing Items in an Array		72

Using Array Properties	73
Looping Over an Array	74
Dictionaries Are Key!	75
Initializing a Dictionary	75
Accessing Values in a Dictionary	76
Adding Items to a Dictionary	77
Removing Items from a Dictionary	77
Replacing Items in a Dictionary	77
Using Dictionary Properties	78
Looping Over a Dictionary	78
What You Learned	79

7 **FUNCTIONS ARE A PARTY, AND YOU'RE INVITED** **81**

In with the Input, Out with the Output	81
Writing a Custom Function	82
Functions Do Even More with Input Parameters	84
Making Party Invitations	84
Inviting All Your Friends at Once	86
Messaging Your Guests	87
Argument Labels	89
Adding a Custom Argument Label	90
Removing an Argument Label	90
Return Values	91
Which Is the Bigger Box?	91
Conditional Returns	92
What You Learned	93

8 **CUSTOM CLASSES AND STRUCTS** **95**

Making a Class	96
Writing a Class Definition	96
Storing Information in Properties	97
Creating an Instance of a Class	98
Accessing the Properties of a Class	98
Customizing Each Cake with Initializers	100
Adding a Birthday Greeting Method	103
Writing a Helper Method	104
A Special Property Called self	106
Class Inheritance	108
Creating a Superclass	108
Creating a Subclass	109
Detecting the Data Type by Typecasting	110
Refining the Data Type by Downcasting	113
Value Types and Reference Types	114
Using Structs	117
What You Learned	118

PART 2: BIRTHDAY TRACKER

9

CREATING BUTTONS AND SCREENS ON THE STORYBOARD

121

An Outline of Your App	122
Creating a New Xcode Project	122
Adding the App Icon	125
Displaying Your Friends' Birthdays	126
Adding the Table View Controller	127
Adding the Navigation Controller	129
Adding a Button	130
Setting Up Control Inputs and Labels	133
Adding Your Friends' Names and Birthdays	133
Making Your App Look Perfect on Every Device with Auto Layout	138
Adding Save and Cancel Buttons	139
What You Learned	140

10

ADDING A BIRTHDAY CLASS AND HANDLING USER INPUT

141

The Birthday Class	142
Creating a New File	142
Writing the Birthday Class	144
Programming User Input	144
Creating the Add Birthday View Controller	145
Connecting Code to the Input Controls	146
Connecting Your Code to the Storyboard	147
Setting a Maximum Birthdate	149
Saving a Birthday	150
Hooking Up the Save Button	150
Reading Text from a Text Field	151
Getting a Date from a Date Picker	152
Creating a Birthday	153
Adding the Cancel Button	153
What You Learned	154

11

DISPLAYING BIRTHDAYS

155

Making the Birthday List	155
Creating the Birthdays Table View Controller	156
Adding Cells to the Table View	158
Setting Up the Birthdays Table View Controller	161
Displaying Birthdays in a Table View	162
Putting It All Together	166
Delegation	166
Connecting the Two Controllers by Setting a Delegate	171
What You Learned	172

12 SAVING BIRTHDAYS 173

Storing Birthdays in a Database	173
The Birthday Entity	174
The Birthday Attributes	175
The Application Delegate	177
Code Cleanup	182
Adding More Features to Our App	185
Alphabetizing Birthdays	185
Removing Birthdays	186
What You Learned	189

13 GETTING BIRTHDAY NOTIFICATIONS 191

The User Notifications Framework	191
Registering for Local Notifications	192
Scheduling a Notification	194
Removing a Notification	199
What You Learned	200

PART 3: SCHOOLHOUSE SKATEBOARDER

14 SETTING THE STAGE 203

Where Do I Get Art and Sound Effects?	204
Making Games with Xcode’s SpriteKit	204
Creating the Game Project	205
Adding Images	206
The Scenery: Displaying a Background Image	207
How It Will Be Played: Screen Orientation	211
Sizing Images for Different Screen Resolutions	213
What You Learned	216

15 MAKING SCHOOLHOUSE SKATEBOARDER A REAL GAME 217

Our Hero, the Skateboarder	217
Creating a Skater Sprite Class	218
Importing SpriteKit	218
Adding Custom Properties to the Skater Class	218
Creating an Instance of the Skater in the Scene	219
Setting Up the Skater	220
Seeing the Skater on the Screen	222
Understanding SpriteKit’s Debugging Information	223

Hittin' the Bricks	224
Creating Sidewalk Bricks	224
Updating Sidewalk Bricks	226
Filling the Screen with Bricks	228
Leaving Gaps to Jump	229
The Game Loop	231
Tracking the Update Time	231
Calculating Elapsed Time for Each Update	231
Adjusting Scroll Speed Using the Elapsed Time	232
Updating the Bricks	233
Up, Up, and Away—Making the Skater Jump	234
Using a Tap Gesture Recognizer	234
Simulating Gravity in a Simple Way	235
Checking for Landings	237
What You Learned	238

16 USING THE SPRITEKIT PHYSICS ENGINE 239

Setting Up the Physics World	240
Physics Bodies	241
Giving Shape to the Physics Bodies	241
Setting Properties of Physics Bodies	242
Giving the skater Sprite a Physics Body	244
Adding Physics Bodies to Bricks	245
Contacts and Collisions	246
Handling Contacts and Collisions	246
Responding to Contacts	249
Applying Forces to Physics Bodies	250
Starting and Ending the Game	251
Starting the Game	251
Ending the Game	254
What You Learned	255

17 ADJUSTING DIFFICULTY, COLLECTING GEMS, AND KEEPING SCORE 257

Speeding Things Up	257
Adding Multilevel Platforms	258
Defining Multiple Brick Levels	259
Changing How Bricks Spawn	260
Adding Gems to Collect	262
Spawning and Tracking the Gems	262
Deciding When to Spawn a Gem	264
Removing Gems	264
Updating Gems	265
Collecting Gems	267
Adding Scoring and Labels	268
Creating Labels	268
Tracking the Score	272
Updating Labels	273

Updating the Player’s Score	274
Making the Gems Valuable	275
Tracking the High Score	276
Tweaking the Gameplay	277
What You Learned	278

18 **GAME STATE, MENUS, SOUNDS, AND** **SPECIAL EFFECTS** **279**

Tracking Game State	280
Adding a Menu System.	282
Creating the MenuLayer Class	282
Displaying the Menu Layers When Needed	286
Removing the Menu Layer	288
Making Sounds	289
Adding the Sound Files	289
Playing the Sounds at the Right Time	290
Shooting Sparks	291
What You Learned	297

RESOURCES **299**

Troubleshooting Errors	300
Apple Documentation	300
Xcode Keyboard Shortcuts	301
iOS Simulator Keyboard Shortcuts	302
Xcode Versions	303

INDEX **305**
