Script #61 source file	The getbtcaddr script contains a typo on line 17 that causes the script to simply print the date command that is intended to run.	Instead of surrounding the date command with single quotes, using \$(date -d @\$first_made) should resolve the typo and print the correct date. Replace line 17 in the source file with: <pre>echo -e "\tFirst seen: "\$(date -d @\$first_made)</pre>	Print 2
