

CONTENTS IN DETAIL

ACKNOWLEDGMENTS XVII

INTRODUCTION XIX

Who Is This Book For?	xx
About This Book.	xx
About Exercises and Projects.	xxi
My Computing Journey.	xxii

1 1 **COMPUTING CONCEPTS**

Defining a Computer	2
Analog and Digital	2
The Analog Approach.	2
Going Digital	4
Number Systems	5
Decimal Numbers	5
Binary Numbers	6
Bits and Bytes	8
Prefixes.	9
Hexadecimal.	11
Summary	15

2 17 **BINARY IN ACTION**

Representing Data Digitally	18
Digital Text.	18
ASCII.	19
Digital Colors and Images	21
Approaches for Representing Colors and Images	22
Interpreting Binary Data.	24
Binary Logic	25
Summary	30

3 31 **ELECTRICAL CIRCUITS**

Electrical Terms Defined	32
Electric Charge	32
Electric Current	32
Voltage	33
Resistance	33
Water Analogy.	34
Ohm's Law	35
Circuit Diagrams	35
Kirchhoff's Voltage Law.	38

Circuits in the Real World	40
Light-Emitting Diodes	42
Summary	44
Project #1: Build and Measure a Circuit	45
Project #2: Build a Simple LED Circuit	50

4**DIGITAL CIRCUITS 53**

What Is a Digital Circuit?	54
Logic with Mechanical Switches.	54
The Amazing Transistor.	57
Logic Gates.	59
Designing with Logic Gates.	61
Integrated Circuits	62
Summary	65
Project #3: Build Logical Operators (AND, OR) with Transistors.	66
Project #4: Construct a Circuit with Logic Gates	68

5**MATH WITH DIGITAL CIRCUITS 73**

Binary Addition	74
Half Adders	76
Full Adders	78
A 4-bit Adder	80
Signed Numbers	81
Unsigned Numbers	85
Summary	87
Project #5: Build a Half Adder	89

6**MEMORY AND CLOCK SIGNALS 91**

Sequential Logic Circuits and Memory	91
The SR Latch	92
Using the SR Latch in a Circuit	95
Clock Signals	98
JK Flip-Flops	99
T Flip-Flops	100
Using a Clock in a 3-Bit Counter	101
Summary	103
Project #6: Construct an SR Latch Using NOR Gates	104
Project #7: Construct a Basic Vending Machine Circuit.	105
Project #8: Add a Delayed Reset to the Vending Machine Circuit.	107
Project #9: Using a Latch as a Manual Clock	109
Project #10: Test a JK Flip-Flop	111
Project #11: Construct a 3-bit Counter.	113

7**COMPUTER HARDWARE 117**

Computer Hardware Overview	117
Main Memory	119

Central Processing Unit (CPU)	122
Instruction Set Architectures	123
CPU Internals	125
Clock, Cores, and Cache	127
Beyond Memory and Processor	130
Secondary Storage	130
Input/Output	131
Bus Communication	134
Summary	135

8 MACHINE CODE AND ASSEMBLY LANGUAGE 137

Software Terms Defined	138
An Example Machine Instruction	139
Calculating a Factorial in Machine Code	141
Summary	144
Project #12: Factorial in Assembly	145
Project #13: Examining Machine Code	155

9 HIGH-LEVEL PROGRAMMING 159

High-Level Programming Overview	160
Introduction to C and Python	160
Comments	161
Variables	162
Variables in C	162
Variables in Python	163
Stack and Heap Memory	164
The Stack	164
The Heap	165
Math	166
Logic	169
Bitwise Operators	169
Boolean Operators	170
Program Flow	172
If Statements	172
Looping	173
Functions	174
Defining Functions	175
Calling Functions	176
Using Libraries	177
Object-Oriented Programming	177
Compiled or Interpreted	179
Calculating a Factorial in C	180
Summary	183
Project #14: Examine Variables	184
Project #15: Change the Type of Value Referenced by a Variable in Python	186
Project #16: Stack or Heap	187
Project #17: Write a Guessing Game	189
Project #18: Use a Bank Account Class in Python	190
Project #19: Factorial in C	191

10**OPERATING SYSTEMS****193**

Programming Without an Operating System	193
Operating Systems Overview	195
Operating System Families	197
Kernel Mode and User Mode	199
Processes	200
Threads	202
Virtual Memory	204
Application Programming Interface (API)	207
The User Mode Bubble and System Calls	209
APIs and System Calls	211
Operating System Software Libraries	212
Application Binary Interface	214
Device Drivers	214
Filesystems	215
Services and Daemons	216
Security	217
Summary	217
Project #20: Examine Running Processes	218
Project #21: Create a Thread and Observe It	220
Project #22: Examine Virtual Memory	222
Project #23: Try the Operating System API	224
Project #24: Observe System Calls	226
Project #25: Use glibc	227
Project #26: View Loaded Kernel Modules	230
Project #27: Examine Storage Devices and Filesystems	230
Project #28: View Services	231

11**THE INTERNET****233**

Networking Terms Defined	233
The Internet Protocol Suite	235
Link Layer	238
Internet Layer	239
Transport Layer	243
Application Layer	245
A Trip Through the Internet	246
Foundational Internet Capabilities	247
Dynamic Host Configuration Protocol	247
Private IP Addresses and Network Address Translation	248
The Domain Name System	250
Networking Is Computing	252
Summary	253
Project #29: Examine the Link Layer	254
Project #30: Examine the Internet Layer	255
Project #31: Examine Port Usage	256
Project #32: Trace the Route to a Host on the Internet	258
Project #33: See Your Leased IP Address	258
Project #34: Is Your Device's IP Public or Private?	259
Project #35: Find Information in DNS	260

12**THE WORLD WIDE WEB****261**

Overview of the World Wide Web	261
The Distributed Web	262
The Addressable Web	262
The Linked Web	264
The Protocols of the Web	264
The Searchable Web	267
The Languages of the Web	268
Structuring the Web with HTML	268
Styling the Web with CSS	271
Scripting the Web with JavaScript	273
Structuring the Web's Data with JSON and XML	275
Web Browsers	277
Rendering a Page	277
The User Agent String	279
Web Servers	280
Summary	282
Project #36: Examine HTTP Traffic	283
Project #37: Run Your Own Web Server	285
Project #38: Return HTML from Your Web Server	287
Project #39: Add CSS to Your Website	288
Project #40: Add JavaScript to Your Website	289

13**MODERN COMPUTING****291**

Apps	292
Native Apps	292
Web Apps	294
Virtualization and Emulation	295
Virtualization	295
Emulation	297
Cloud Computing	298
The History of Remote Computing	298
The Categories of Cloud Computing	299
The Deep Web and Dark Web	301
Bitcoin	302
Bitcoin Basics	302
Bitcoin Wallets	303
Bitcoin Transactions	304
Bitcoin Mining	305
Virtual Reality and Augmented Reality	306
The Internet of Things	308
Summary	309
Project #41: Use Python to Control a Vending Machine Circuit	311

A
ANSWERS TO EXERCISES **319**

B
RESOURCES **333**

Buying Electronic Components for the Projects.	333
7400 Part Numbers.	334
Shopping.	335
Powering Digital Circuits.	336
USB Charger	336
Breadboard Power Supply	337
Power from a Raspberry Pi	338
AA Batteries.	339
Troubleshooting Circuits	340
Raspberry Pi	341
Why Raspberry Pi.	341
Parts Needed.	342
Setting Up a Raspberry Pi	343
Using Raspberry Pi OS	344
Working with Files and Folders.	346

INDEX **351**
